

ESD has updated the Student + Parent Portal application to improve the user's experience and to incorporate a similar look and feel to the mobile version. Along with these improvements, the name has been changed to **Family Access** to better reflect the audience of the product.

Students and parents will use the same URL to get to the site and their user names and passwords remain the same. The information shown in the portal also remains the same but with a little different look. If you or your families have any questions, please refer to the instructions on creating a new registration included at the site.

Please continue to encourage your families to create an account and stay connected with their student.
