

**Good morning Sarasota Middle School  
Today is Tuesday, November 27, 2018**

A few words of wisdom to start your day-Four centuries ago, Zacharias Janssen asked the questions: Are there forms of life on our planet that cannot be seen by the human eye?

For most people, the answer was no. But Zacharias Janssen did not accept that answer. He invented the microscope and discovered an *expansive* world of microscopic life forms. Zacharias Janssen *expanded* his mind, and the entire world as people knew it expanded.

So today, think big, then have the courage to think bigger and beyond bigger! *Your* world might open up in surprising ways!

*All busses have arrived on time and all students should be in their 1<sup>st</sup> period class at this time.*

*Students, remember our Panther Pact: be Polite, Prepared, Productive and Safe!*

*Have a terrific Tuesday!*
